

CORE COMPETENCIES

- **Website design and development:** custom, accessible designs and redesigns, CMS (WordPress, Drupal, Joomla), hosting and maintenance.
- **Custom programming:** web applications, plugins, scripts, APIs and integrations, automation, and legacy code (PHP, Python, JavaScript, SQL, and more).
- **Linux server infrastructure:** web and mail servers, load balancing, domain registration and DNS management, server and site migrations, SSL certificates, patching, and uptime monitoring.
- **Maintenance and support:** ongoing site and server maintenance, updates, and technical support plans.
- **Server security, backup and recovery:** firewalls, intrusion prevention and hardening; automated and offsite backups, RAID redundancy, and tested restores.
- **Website security and incident recovery:** malware removal, forensic cleanup, blacklist removal, hardening, and a plain-language report after every job.
- **Section 508 / WCAG 2.1 AA:** accessibility review and remediation of sites and documents.
- **Writing, design and publishing:** technical and plain-language writing, editing, graphic and logo design, layout, print and digital production; custom email newsletters and mailing list services.
- **Training, tutoring and education:** curriculum design, eLearning modules, interactive learning, live online instruction, and one-on-one tutoring.
- **Products and sourcing:** commercial technology, software and supplies sourced to specification.

DIFFERENTIATORS

- **Owner-performed.** The person you contract with does the work. There is no offshore queue.
- **30+ years of hands-on experience.** Our principal has run web hosting and development businesses since 1995.
- **Proven with paying clients:** 5.0-star rating across 285 verified client reviews on Fiverr.
- **Security by design:** parameterized queries, strong password hashing and CSRF protection are standard in our code.

PRINCIPAL EXPERIENCE

- **Instant Access Internet Services (1995–present):** runs its own Linux web servers; hosting, web design, custom programming, and app development.
- **fixmyhackedwebsite.com (2012–present):** hacked-site recovery for clients in 34 countries.
- **Green Submissions:** free submission-management software, in use at about 230 sites.
- **Prolific Press (2009–present):** 75+ books and 150+ journal issues edited and published.
- **Teaching:** Zoom code mentoring; 12-week WordPress Security and AI curricula; tutorial videos on YouTube.
